

## G.P.SOLAPUR

## Practical 8

# we use Wireshark and capture TCP, UDP, IP, ARP, ICMP, FTP packets.

Q) What is Wireshark?

→ Wireshark is a network protocol analyzer, or an application that captures packets from a network connection, such as from your computer to your home office or the internet. Wireshark is the most often used packet sniffer in the world.

Q) Write steps to install Wireshark and filter a packet.

1) open browser

2) search for 'Download Wireshark'

3) click on first link. 'Downloaded installer for os'

4) & Double click on Downloaded file follow the simple installation steps.

5) Wireshark is ready to use
